## Boans's Proposed New Federal Income Tax

Listed below are my suggestions for a new fair income tax for all citizens:

1. Our Federal Income Tax system needs to be changed to a completely different system that is fair for all income brackets. This includes all individuals and businesses.
2. I propose a Flat Tax and a Consumption Tax.
3. The Flat Tax portion should cover two-thirds, and the Consumption Tax portion to cover one-third of the revenue.
4. The taxes shall not be progressive, or contain any means testing.
5. To obtain some tax revenue from the 50% in this country that pay no income taxes, the Consumption Tax is needed. It shall not be a Value Added Tax. Food and prescription drugs shall be exempted.

I am both a fiscal and constitutional conservative. I am sure my proposed tax reform would really stimulate our economy. It is also extremely important we have a constitutional amendment for maintaining a balanced budget every year.

Sincerely,  
Byron Boan
