

You are working on tax reform. We seriously hope that you are considering the Fair Tax as a viable replacement for our current tax system.

As members of the Charitable/Exempt Organization Working Group, you must be aware that reducing the tax burden on the American people will serve to increase charitable giving. The American people will be allowed to spend more of their money as they choose.

The Fair Tax plan is revenue neutral. It will give the government the revenue it needs and it will enable the American people to pay their taxes how they see fit. It will also tax those who avoid paying taxes for whatever reason. They will be taxed on what they purchase.

The IRS has become a bloated entity as you will agree, if you are a thinking person. No person should have to spend hours and hours to decipher what they have to pay in taxes or have to hire another person to prepare their tax returns. The Fair Tax would serve the American people by relieving them of this burden.

With the Fair Tax, corporations would not be taxed. In other words, corporations would not inflate their products by making the consumer eat the cost of the taxes they have to pay, thereby, adding another tax to the American consumer. If America is the first country to do this, we believe, more corporations would come to this country and thereby, grow our economy.

These are just a few of the benefits we see of adopting the Fair Tax.

Please consider this tax reform proposal.
