

TO: Income and Tax Distribution - Tax Reform Working Group

Please consider eliminating the income tax and self-employment tax and instead support the Fair Tax Plan. Some key benefits are:

- makes American products more competitive overseas
- ensures Social Security and Medicare funding
- no federal taxation up to poverty level via a monthly rebate
- insures transparency and accountability to US Tax Policy

The FairTax Plan is a simple, fair and transparent solution to replace our current tax system. It treats all citizens equally and allows American businesses to thrive, all while generating the same tax revenue for the government through the establishment of a national retail sales tax of 23% on new goods and services.
