

Dear,  
Rep. Kevin Brady (R-Texas) and Rep. Mike Thompson (D-Calif.)

We are writing to ask you both to Terminate the “Production Tax Credit”.

The PTC project has not proven to be good for America. Instead it has destroyed Property values & our American quality of life. Illness coming from the PTC project being a top priority with many Americans.

The companies involved in this project take the money then go bankrupt leaving the American people stuck with a wasteful & sickening program. Our quality of life changed forever!

Please “Terminate” PTC & use that money toward other good American energy projects. The money spent on the PTC could be & should be used in good energy projects to advance America.

Thank you,

Thomas & Maryann Plasterer
