**ATTN: International Tax Reform Working Group**

Dear REP. NUNES and REP. BLUMENAUR,

I am writing to ask that the International Taxation Committee of the Ways & Means Committee for Tax Reform seriously consider the American Citizens Abroad (ACA) proposal for reform to Residency-Based Taxation (RBT).

See website: <http://americansabroad.org/files/6513/6370/3681/finalsubrbtmarch2013.pdf>

As one of nearly 7 million American citizens living, working and voting from abroad, and contributing to the economic growth of the U.S. economy, I believe the current Citizenship-Based Taxation (CBT) regime must be reformed. Current tax policy is negatively affecting this important sector of Americans and their ability to compete for jobs, grow the US economy through international business and exports, and live overseas. Current tax policy damages both individuals and the welfare of our country.

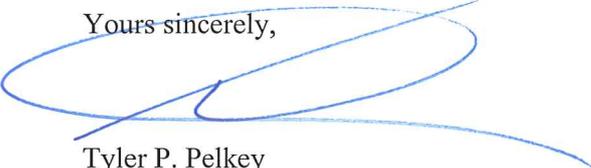

The following are some examples of the fallout on Americans working overseas from current U.S. Citizenship based taxation:

- Inability to relocate and work internationally
- Denial of job opportunities or job advancement
- Refusal of entry into business partnerships
- Closure or denial of financial instruments (pensions, insurance policies, bank accounts, etc.)
- Exposure to double taxation or increased tax burden
- Financially ruinous penalties due to broad application of criminal tax evasion regulations on those making simple filing errors due to complexity of the US tax code.

I have been personally affected by this situation through the threat of double taxation or increased tax burden.

Please seriously consider the RBT proposal submitted by American Citizens Abroad. A move towards a residence-based system, like the rest of the world, would not only be simpler and fairer for Americans living abroad, but it would actually bring in MORE tax revenue than the current system, which wastes compliance resources for very little return. RBT would increase United States exports strongly by facilitating American mobility in the global business environment of today's world.

Yours sincerely,

Tyler P. Pelkey
