June 4, 2004

The Honorable William M. Thomas  
2208 Rayburn House Office Building  
Washington, DC 20515

Dear Mr. Chairman:

I am writing on behalf of AMT- The Association For Manufacturing Technology in support of The American Jobs Creation Act of 2004, H.R. 4520, introduced today in the House of Representatives. The legislation provides a solid benefit for America's beleaguered manufacturing sector. Early passage will avoid additional European sanctions on our members' exports to Europe and will have a profound effect on the ability of U.S. manufacturers to compete in the marketplace.

Sincerely,

James H. Mack  
Vice President  
Tax and Economic Policy
