

## **KCA supports passage of Medicare conference report**

**For immediate release  
November 18, 2003**

WASHINGTON, D.C. – The Kidney Cancer Association today announced its strong support for the Medicare prescription drug conference report and urged Congress to pass it before they adjourn.

"We're glad the conferees have reached agreement on a Medicare bill that provides seniors with the prescription drug coverage they need." KCA CEO Bill Bro said. Adding, "Congress must fulfill its promise to America's seniors."

Through the KCA's grassroots advocacy network, more than 4,000 patients, family members, and medical professionals are asked to send a message to Congress urging passage of a Medicare prescription drug bill.

"We invite everyone to join this grassroots effort to encourage passage by writing their elected representatives," Bro said. "We've made this a very simple Web-based process. Go to [www.kidneycanceralliance.org](http://www.kidneycanceralliance.org) and simply point and click to write personalized letters to legislators."
