**B. Does the tariff relief specified in this Miscellaneous Tariff Bill benefit downstream producers, manufacturers, purchasers, and consumers?**

Tariff relief on THEIC will benefit downstream producers, manufacturers, purchasers and consumers by lowering manufacturing costs. THEIC is used to manufacture polyester magnet wire enamels, which are then coated and cured on copper and aluminum wire. They are generally overcoated with polyamide-imide or polyamide (nylon) products. The resulting magnet wires are used in many different applications, e.g., but not limited to, electric motors, various electric tools and appliances, hermetic motors, solenoids, and relays.

**Part III: Financial Benefit Certification**

I hereby certify that neither myself nor my spouse has a financial interest in any entity named in Part II. A above.
