

We oppose the bill as written because even though we import these materials we would be excluded from benefiting from the temporary suspension of duties because of a technicality, which is the size of the rolls being imported.

The bill as written would benefit one company in our industry to the exclusion of other such as us.

Below is the wording of the bill with suggested changes that would benefit everyone in the industry, rather than one company. The areas we would suggest removing are lined out with the suggested replacement wording in yellow.
