

June 22, 2012

Dear U.S. Representative s:

The Evanston Chamber of Commerce would like to show our support of the Miscellaneous Tariff Bill which includes HR 5160, HR 5161, and HR 5162.

We sincerely believe that passage of these bills would give one of our local businesses, SGL Carbon Fiber, an equal standing in the marketplace, which in turn would preserve and possibly increase local jobs in our community.

SGL in Evanston Wyoming is a huge supporter of our local community. Their management team plays an integral part of the leadership in our community and their employees dedicate many volunteer hours when needed, not only helping local people in need, but by volunteering at local events that generate revenue for our city.

The passage of these bills would create a positive economic impact in our local economy by ensuring SGL Carbon Fiber would maintain their position with our community in terms of revenue and support. If these bills are not passed the potential negative impacts to our community include increased vacant housing as well as an increase in unemployment.

Therefore, the Evanston Chamber of Commerce Board of Directors requests your support of the Miscellaneous Tariff Bill.

Respectfully,

Dawn Darby
Executive Director
