The Honorable Dave Camp
Chairman, House Ways & Means Committee
U.S. House of Representatives
Washington, DC 205015

Dear Chairman Camp:

On behalf of the Celanese Corporation, I am writing to express strong support for the miscellaneous tariff bill (MTB) process in general, and to inform you of our specific support for HR 5239.

Celanese is a major domestic manufacturer of specialty materials and chemical products that employs more than 3,200 workers in eight states. Celanese is often forced to import certain chemicals and resins as inputs for further processing that simply are not available from U.S. suppliers. As such, we depend on the MTB to help eliminate or reduce duties on a limited number of items that we must import and that do not compete with any other domestic producer. The MTB process allows us to reduce our production costs and helps our U.S. manufacturing facilities to remain globally competitive.

HR 5239 would temporarily reduce the U.S. import duty on Para-Dichlorobenzene, also known as PDCB. PDCB is a high performance polymer that is used in the production of semi-crystalline thermoplastics.

Noting that there are no domestic producers of PDCB, Celanese incurs added production costs in the form of duties paid on this input. This in turn hampers our domestic operations and undermines our ability to maintain the U.S. jobs that are involved in the processing of PDCB. For this reason, we greatly appreciate your efforts to secure passage of an MTB package prior to the end of this year.

Thank you for your consideration of our views in this matter and please let me know if you have any specific questions related to our support of HR 5239.

Sincerely,

Robert D. McArver
Vice President, Global Public Affairs
