RE: SGR Repeal and Reform Proposal: Medicare Payment Locality Update Needed in California

Dear Chairman Camp and Upton and Ranking Members Levin and Waxman:

Community Hospital of Monterey Peninsula (CHOMP), a non-profit healthcare provider serving the Monterey Peninsula and surrounding communities, applauds your efforts to resolve the problems plaguing the Medicare payment program for physicians.

The long outdated California locality designations used in the current payment formula for physicians designates 14 counties, including some as large as San Diego, Monterey and Sacramento as “rural”, thereby reducing payments and ignoring demographic and practice cost increases. The geographic regions used by Medicare for hospitals are updated regularly so that hospital reimbursement accurately reflects local costs to deliver care. Unfortunately, the physician regions have not been updated in 15 years. As hospitals and physicians work together to provide care in their local communities, it is only fair that they receive accurate payment for the services they provide.

Physicians practicing in these misclassified regions are paid as much as 14% below what Medicare would pay if they were in a correctly classified region. Community Hospital of Monterey County continues to encounter difficulty recruiting physicians because the cost of living and the cost to practice are high but the Medicare locality payments have not kept pace with these real costs. Most of these regions have lost substantial numbers of physicians. *Thus patients in Monterey County report serious access to care challenges, including long waiting times to see physicians.* Exacerbating the problem is the fact that private payers track Medicare payments so the Medicare locality payments negatively impact access to care for all patients.

CHOMP supports the solution proposed by Representatives Darrel Issa and Sam Farr to redistribute physician payments within California in a way that would have ***no fiscal impact on the federal government.*** Their plan is a California financed solution to a California problem. We acknowledge that the outdated Medicare payment localities are a national problem that needs reform, but we urge you to start by addressing the most pressing concerns in California where the payment discrepancies are the largest.

When it comes to your health, everything matters

We urge your support for this important effort to address more equitable payments for physicians in California and preserving access to care for all Californians. Please contact Steven J. Packer at 831.625.4502 or Steven.Packer@chomp.org if you have questions or need additional information.

Sincerely,
