

House:

I am a federal employee and one of your constituents. I am very concerned about legislation that has been introduced by Congressman Dave Camp to push federal employees out of the Federal Employees Health Benefits Program (FEHBP) and into the insurance exchanges established under the Affordable Care Act (ACA).

H.R. 1780 would put federal employees in a special class where they would be prohibited from receiving health insurance through their employer. It would treat federal employees differently from state and local government employees and most employees of large private sector companies who receive health insurance benefits through their employer. The primary purpose of the Affordable Care Act was to provide a marketplace for the sale and purchase of health insurance for those who do not have such coverage – not to take coverage away from employees who already receive it through their employers.

I work hard and am proud of the services that I provide to your constituents every day. One of the main benefits I receive as a federal employee is the ability to purchase health insurance coverage through the FEHBP with an employer contribution towards those benefits. Please let me know your views on this legislation. I look forward to hearing back from you.
