

On behalf of Savannah Area Genealogical Association, I urge you to **Please keep the Social Security Death Index available to everyone.**

Genealogy hobbyists and professionals need the Social Security Death Index.”

- Information provided by Social Security Death Index helps reunite families of MIAs and KIAs with the remains of their loved ones.
- Frequently, the information found in SSDI, verifies a family tie that is needed for genetic medical conditions.
- If banks and other businesses were doing their jobs properly, the misuse of Social Security Numbers would not be an issue. The numbers in SSDI would help them prevent identity theft.
