

South Dakota Health Equity Facts

The U.S. Census Bureau estimates **South Dakota's population is 884,659**. Nationally, **South Dakota ranks 23rd in state health system performance**, according to the Commonwealth Fund's State Health System Performance Scorecard.

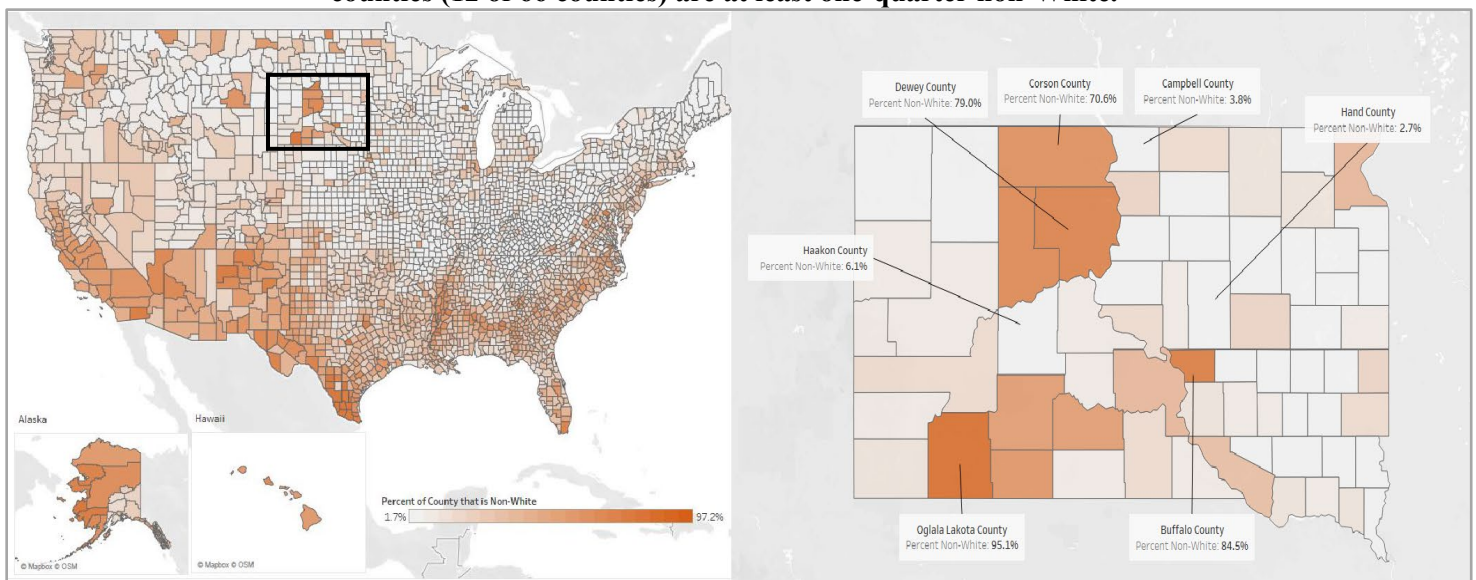

Key Demographic and Equity Metrics

	South Dakota Statistics	Compared to U.S. Average
White Residents	82 Percent of Population	Higher
Black Residents	2 Percent of Population	Lower
Hispanic or Latino Residents	4 Percent of Population	Lower
Median Household Income	\$56,521	Lower
Average Life Expectancy	79.4 Years	Lower
Uninsured Rate	9 Percent of Population	Lower
Maternal Mortality Rate	24.5 Deaths per 100K Births	Higher
Lack Broadband Access	11.5 Percent of Residents	Higher
Residents Living in Primary Care Shortage Area	245K Residents	Lower
Mental Health Workforce Shortage Areas	63.6 Percent of Counties	Lower
Adopted Medicaid Expansion (37 States Expanded)	No	N/A

Race/Ethnicity

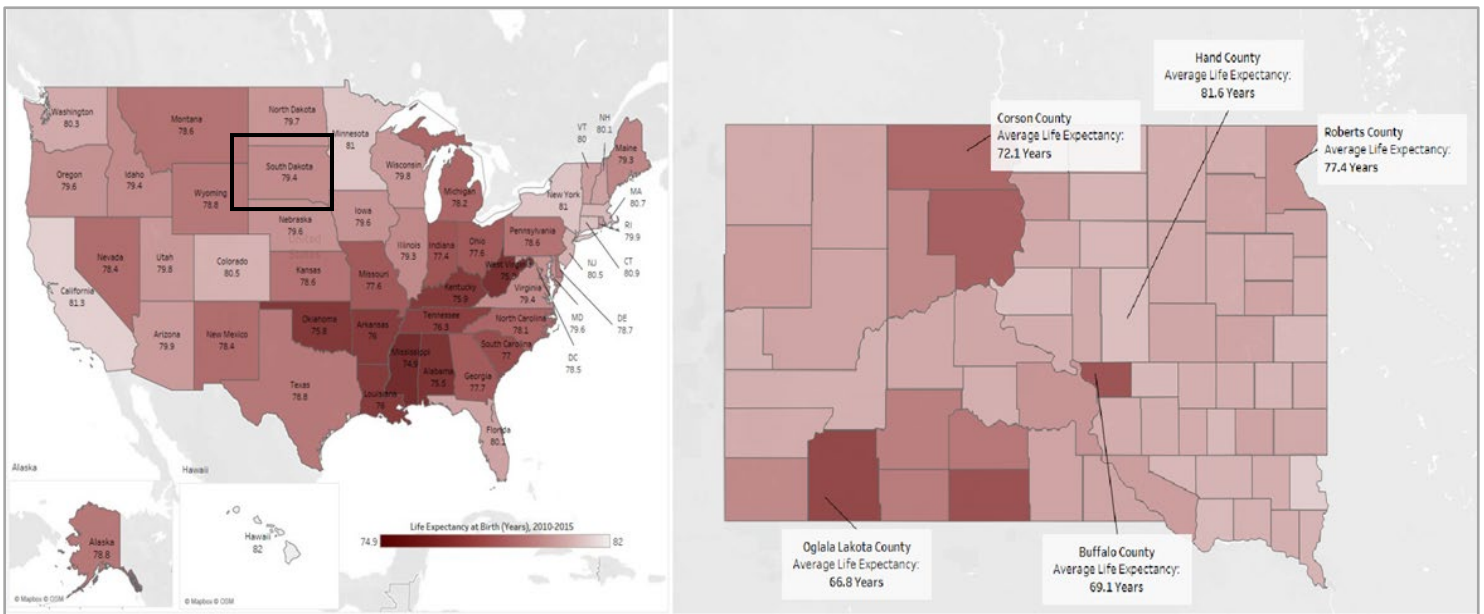

Racial health inequities persist among Black, American Indian/Alaska Native, Latinx, and Asian residents across the nation. Nationwide, 36 percent of all counties are at least 25 percent non-White. **In South Dakota, 18 percent of all counties (12 of 66 counties) are at least one-quarter non-White.**

Sources: County-level estimates retrieved from the American Community Survey 2018 *Race* datafile. Notes: Although the “non-white” categorization is used federally, some experts argue that the term Black, Indigenous, and People of Color (also known as BIPOC) is a more appropriate term than non-white.

Life Expectancy

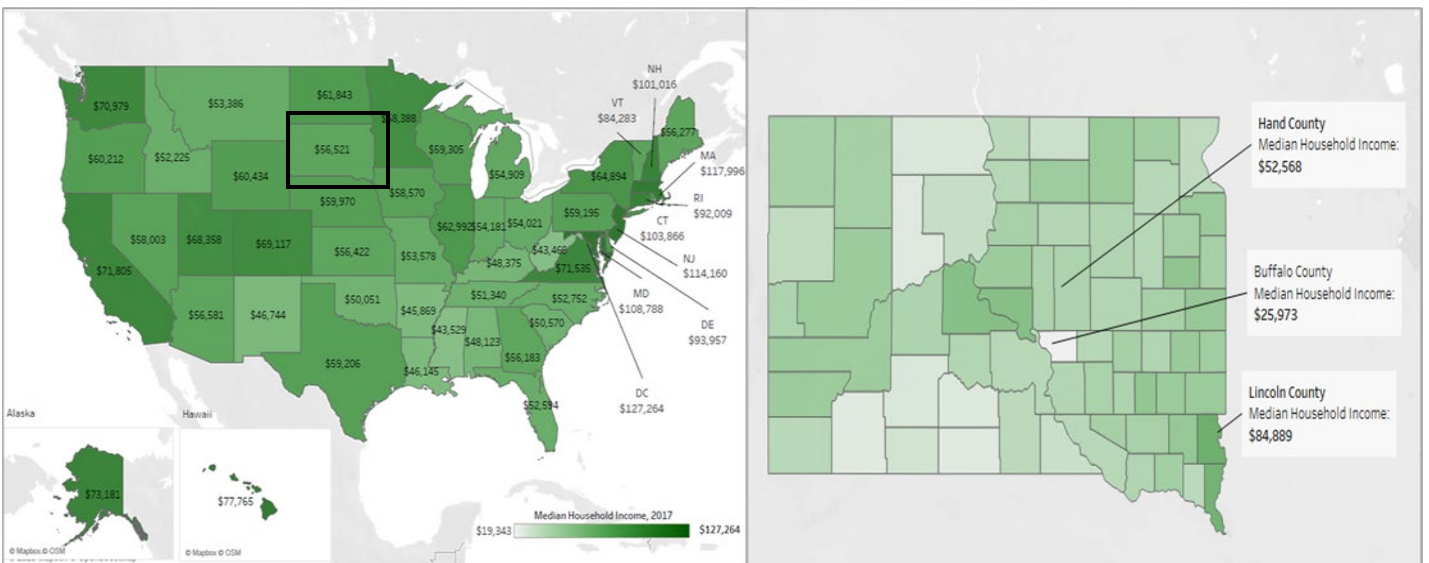

Life expectancy metrics can vary drastically by geography but are useful in examining how environmental, political, socioeconomic, and structural conditions impact health. **In South Dakota, the average life expectancy is 79.4 years, 0.9 years greater than the U.S. average life expectancy of 78.5 years.** In 15 of South Dakota's 66 counties, the average life expectancy is below the U.S. average – significantly lower in counties with higher proportions of non-White residents.

Sources: State-level life expectancy data retrieved from Kaiser Family Foundation *Life Expectancy at Birth* data; county-level estimates retrieved from the National Center for Health Statistics *National Vital Statistics System (NVSS)* datafile.

Income

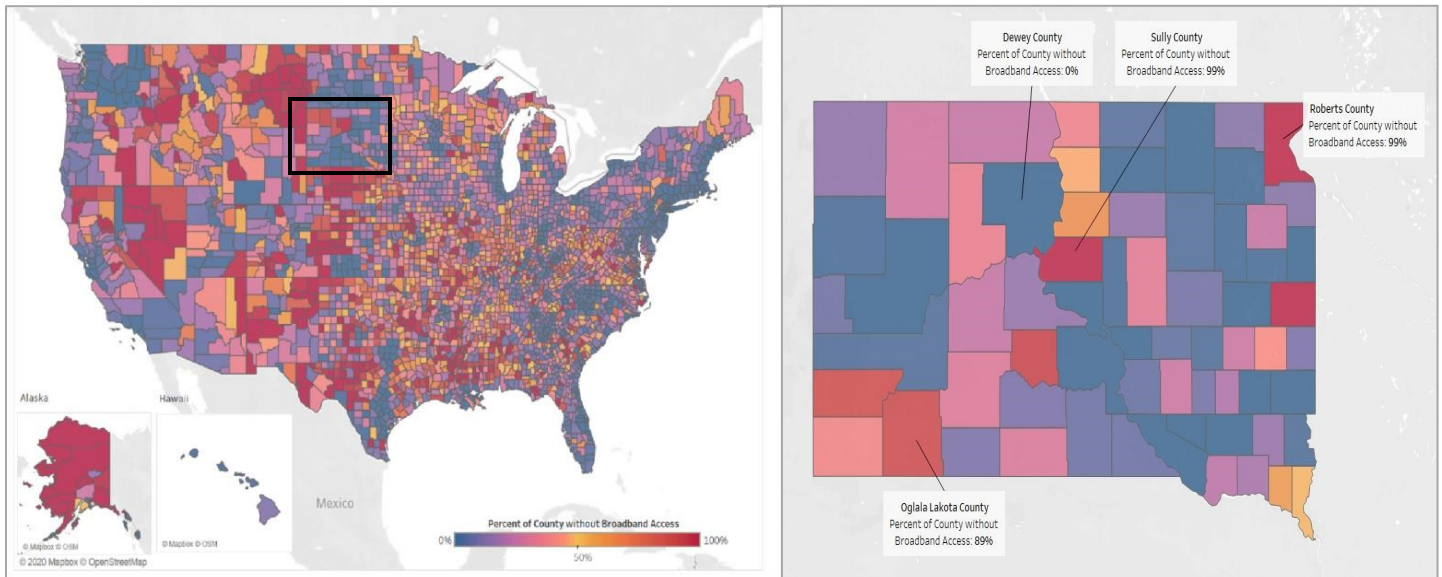

Higher income correlates with lower mortality and better health outcomes. **In South Dakota, the median annual household income is \$56,521, which is 6.3 percent lower than the U.S. median annual household income of \$60,336.** In 57 of South Dakota's 66 counties (86.4 percent of South Dakota's counties), the median annual household income is below the U.S. average.

Broadband Infrastructure

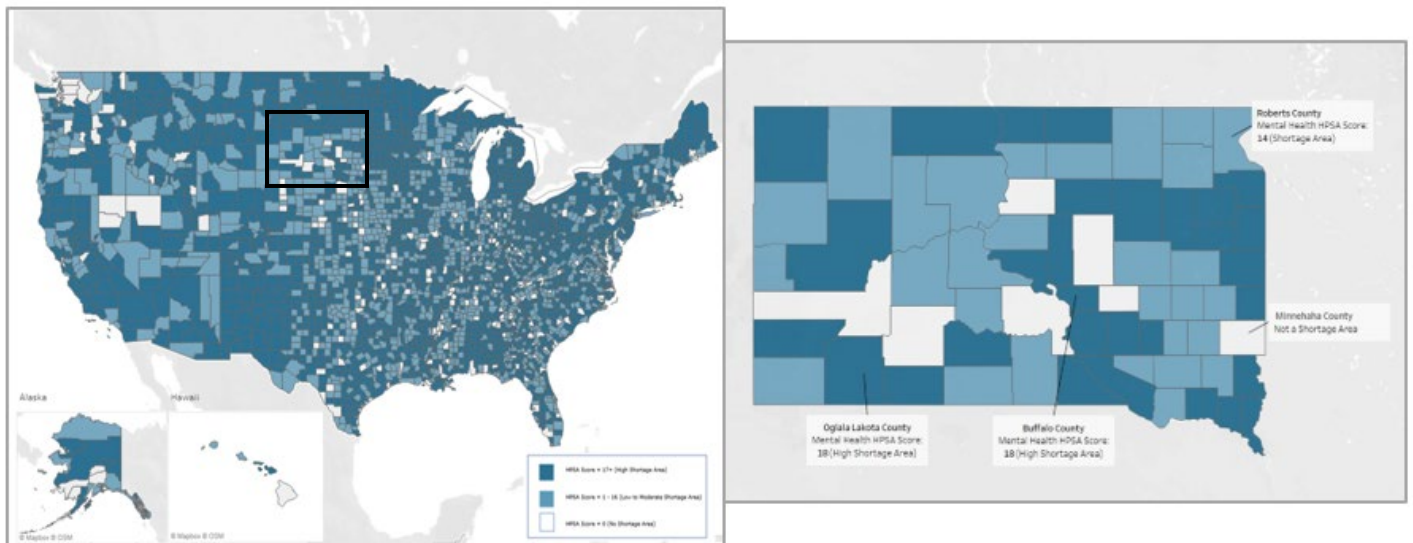

According to the Federal Communications Commission, 10 percent of U.S. residents lack access broadband – a trend that the Joint Economic Committee found to be more pervasive across communities of color. **Approximately 11.5 percent of South Dakota residents lack broadband access, compared to 6.5 percent of residents across the U.S.** In 8 of South Dakota’s 66 counties (12.1 percent of South Dakota’s counties), at least half of all county residents lack broadband access.

Sources: Federal Communications Commission (FCC) 2019 *Fixed Broadband Deployment* datafile.

Mental Health Workforce Shortages

The Health Resource and Services Administration (HRSA) designates geographic regions as health professional shortage areas (HPSAs) if they lack health care providers. Counties in South Dakota exhibit an average Mental Health HPSA score of 14.8 compared to the national average of 15.5 (on a scale of zero to 25, where 25 denotes an extreme HPSA shortage), **Sixty-four percent of South Dakota’s counties (42 of 66 counties) are designated as mental health HPSAs.**

Source: Health Resources & Service Administration *HPSA Mental Health* Datafile.

Notes: HPSA Scores are developed for use by the National Health Service Corps to determine priorities for the assignment of clinicians. Scores range from 0 to 25 for primary care and mental health. Larger scores correspond to higher priority areas.
