

Delivering Relief from Obamacare's Taxes and Mandates

The Problem

Obamacare is hurting more people than it is helping. The law put Washington—not patients—in control of health care choices. It led to higher costs, fewer choices, and less access to the care people need. And it forced Americans into plans that they don't like and can't afford.

We need to act swiftly to deliver relief from Obamacare's failures and to get Washington out of the examining room.

“This year the counties in my district have lost insurance carriers. Monroe County lost one carrier and Miami-Dade lost two carriers participating on the exchange ... Emilie is paying over \$700 per month for a plan with a deductible that is over \$6000, but she has been **unable to find a doctor in her area who will accept her insurance.** Even though she has insurance, her options are severely limited and premiums continue to increase.”

REP. CARLOS CURBELO (R-FL)

The Solution

House Republicans are working with the Trump Administration to dismantle Obamacare's failing bureaucracy and clear the way for a 21st century health care system focused on patients.

The *American Health Care Act* provides relief from Obamacare's most damaging taxes and mandates, clearing the way for patient-centered policies proposed by President Trump. Specifically, the Ways and Means provisions of the legislation will:

- **Eliminate the individual and employer mandate penalties.** The *American Health Care Act* restores the free market for health insurance so Americans have the freedom and flexibility to make the health care choices that are right for them. Americans will no longer be forced to purchase Washington-approved plans through a government-run exchange.

Delivering Relief from Obamacare's Taxes and Mandates

(cont.)

MORE THAN
\$1 trillion
in taxes raised by Obamacare.

- **Provide relief from Obamacare's taxes.** Obamacare imposed more than \$1 trillion of anti-growth taxes on families, job creators, and health care providers.

The *American Health Care Act* delivers relief from all of Obamacare's damaging taxes, including dismantling taxes on:

- Health insurance premiums;
 - Prescription drugs;
 - Over-the-counter medications;
 - Medical devices; and
 - The increased expense threshold for deducting medical expenses.
- **Repeal Obamacare's subsidies.** Subsidies under Obamacare are flawed and leave millions of middle-class individuals and families without any real help to pay for health care. Instead, with the *American Health Care Act*, low- and middle-income Americans will receive an advanceable, refundable tax credit to purchase a plan tailored to their needs.
